Summarizes progress since previous meeting
(There was no previous meeting)
1. Changed our project entirely from "Airbnb for naps" to"Tinder for depression" (11/13)
2. Got extension on submitting design till ~11/18 due to Kim having mono and Casie having a concussion
3. Figured out design details (11/24)
4. Wrote out entire plan (11/24-11/25)
5. Got started on code
    a. User login, logout, etc.
    b. Display availabilities using calendar widget

Identifies achieved and missed milestones
Missed:
1. We did not assign each team member to tasks. (we actually still haven't done that, aside from Shinjini assigning everything she's done to herself)
Achieved: same as progress.

Identifies difficulties encountered
1. People were generally in bad health, which made meeting harder and distributing work really hard.
2. One team member (who later dropped the class), was not being able to work at all.
3. Most work fell on the last member, but the other members tried really hard to help given their conditions

Identifies changes to problem analysis or design
1. None so far
